PROFESSIONAL SUMMARY

Full-Stack Mobile Engineer and product builder with 5+ years delivering production apps across Flutter, Android, iOS, React Native, and Django/Python backends. Independently designed, built, and shipped a live product serving real users. Worked with global clients across Australia, New Zealand, USA, and Dubai. Holds two Anthropic certifications - Claude Code in Action and Introduction to Agent Skills. Early AI-dev practitioners using Claude Code CLI, Cursor, Copilot, and Codex to deliver features 10x faster and meaningfully reduce LLM API costs in production. Builds and exposes REST APIs via Django REST Framework as standard across all backend projects. Thrives in async-first, remote-distributed team environments.

PROFESSIONAL EXPERIENCE

Senior Software Engineer & Team Lead 06/2023 – Present

Infinity Soft Systems — Noida, UP, India | Remote-capable

- Delivered 10+ production apps for clients in Australia & New Zealand using Flutter, React Native, iOS Native, Android Native.
- Built and maintained Django REST Framework APIs — auth, CRUD, WebSocket endpoints, and third-party integrations across all projects.
- Integrated AI features via OpenAI API — smart search, in-app assistants, and recommendation engines.
- Reduced LLM API costs ~60% through token compression, prompt caching, and context windowing strategies.
- Automated full CI/CD pipeline via GitHub Actions + Fastlane — cut release turnaround from 2 days to under 2 hours.
- Led team of 4 with async-first workflow (Jira + Notion + Slack) mirroring remote-first global team culture.
- Zero rejected builds across 12+ consecutive App Store & Play Store release cycles.
- Used Claude Code CLI and Cursor IDE daily — measurably increased team feature delivery velocity by 10x.

Flutter Developer 09/2021 – 08/2023

Shine Web Solutions Pvt. Ltd. — Noida, UP, India

- Built 6+ Flutter & Android apps with Firebase, Supabase, REST APIs, WebSockets, and payment gateway integrations.
- Designed and exposed REST APIs using Django REST Framework — supporting mobile app backends with auth, CRUD, and real-time data endpoints.
- Implemented GetX, Provider, and BLoC state management patterns for scalable, maintainable architectures.
- Early adopter of GitHub Copilot — increased personal feature output by 40%.
- Collaborated asynchronously with overseas clients, building strong remote communication habits.
